

Research Internships in Science and Engineering at the University of California, Santa Barbara

Spend the Summer of 2007 in a research lab at UCSB.
Program Dates: June 19th to August 24th

Considering a career in science? The Research Internships in Science and Engineering Program at UCSB brings science and engineering majors from all over the country to UCSB for a summer research experience. Interns are individually matched with a mentor and gain first-hand experience of science in some of the best laboratories in the country. Interns also attend weekly meetings, special seminars and develop presentation skills.

- Intern stipend is \$3800 for the 10 week internship
- Housing and up to \$500 for travel are provided
